Chart of Accounts

The Chart of Accounts represents the “hub” of your accounting system. Every transaction you enter flows through to the Chart of Accounts. The end result of the accounting process is the financial statements. In QuickBooks, your Chart of Accounts is your financial statements. Each account in the Chart of Accounts becomes a line on either the Balance Sheet or the Profit & Loss Statement.

You use the Chart of Accounts to track the financial transactions of your company. For instance, a check for office supplies would not be categorized as Advertising Expense or Cleaning Expense. Instead, the check would be categorized as Office Supplies.

Balance Sheet

The Balance Sheet is the financial *snapshot* of your business. If someone took a photograph of your business right now, what would the financial picture look like? The Balance Sheet is comprised of **assets**, **liabilities**, and **equity**.

- **Assets:** Those items owned by your business including amounts owed to you by others. Assets include all your company owns such as cash, receivables, and inventory.
- **Liabilities:** What your business owes other people and companies. Liabilities include accounts payable, payroll taxes due, and loans.
- **Equity:** What the owners really own in the business. Equity accounts include common stock and retained earnings.

The screenshot shows two windows from a financial software application. The 'Chart of Accounts' window on the left lists various accounts, including 'Service Income' which is highlighted. The 'Profit & Loss' window on the right shows a report for 'Buildem, Inc.' for the period 'January 1 through April 1, 2023'. The report is based on the 'Accrual Basis'. A large black arrow points from the 'Service Income' account in the Chart of Accounts to the 'Service Income' line item in the Profit & Loss statement.

Items

Understanding Items

Items are critical to maximizing the use of QuickBooks. Items perform these functions in QuickBooks.

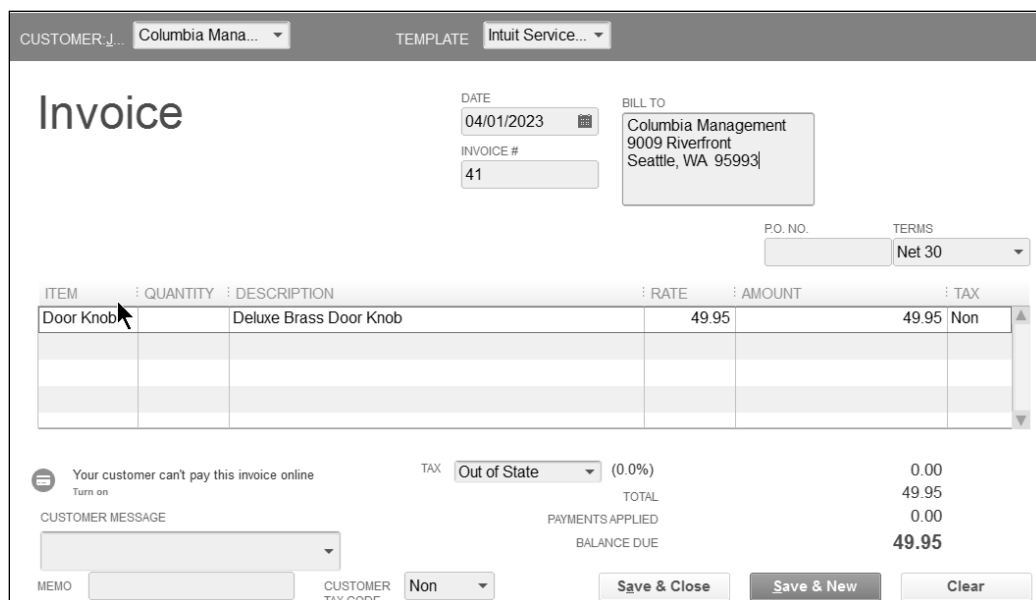

1. Any line item on a purchase order, invoice, or estimate must be set up as an Item.
2. Items make it easier to fill out sales forms.
3. Items act as *pointers* for the financial statements. In other words, items handle the behind the scenes accounting for sales and purchases.
4. Items allow you to track quantities purchased and sold in addition to dollars purchased and sold.

How Much Detail

How much detail is necessary when setting up items? The rule of thumb is to set up as much detail as possible to get the full benefit of items. However, the limit is 14,500 items in a QuickBooks company file (unlimited in QuickBooks Enterprise Solutions). A good method is to set up individual items only if it will be used more than once. If an item will only be used once, a *generic* item might be more appropriate.

Sales Tax

Set Up Sales Taxes

Tracking sales taxes can be a challenge. For instance, some customers might be taxable while others are not. Also, you might have to tax customers at different rates depending upon where they are located. And finally, some of the things you sell might be taxable while others are not. QuickBooks can help you track and control sales taxes. There are five steps to setting up sales taxes in QuickBooks:

1. Set sales tax preferences
2. Set up sales tax items and groups
3. Set up sales tax codes
4. Assign a sales tax code to items
5. Assign a sales tax item and sales tax code to customers

1- Sales Tax Preferences

1. Click the **Manage Sales Tax** icon on the **Home** page.
2. Click the Sales Tax Preferences button.

The screenshot shows the 'Preferences' window in QuickBooks, with the 'Company Preferences' tab selected. The window is titled 'Preferences' and has a close button (X) in the top right corner. On the left is a sidebar with various categories: Accounting, Bills, Calendar, Checking, Desktop View, Finance Charge, General, Integrated Applications, Items & Inventory, Jobs & Estimates, Multiple Currencies, Payments, Payroll & Employees, Reminders, Reports & Graphs, Sales & Customers, Sales Tax (highlighted), Search, Send Forms, Service Connection, and Spelling. The main area is divided into sections: 'Do you charge sales tax?' with 'Yes' selected; 'SET UP SALES TAX ITEM' with an 'Add sales tax item...' button and a dropdown for 'Your most common sales tax item' set to 'Dallas'; 'ASSIGN SALES TAX CODES' with 'Taxable item code' set to 'Tax' and 'Non-taxable item code' set to 'Non', and a checkbox for 'Identify taxable amounts as "T" for "Taxable" when printing'; and two sections for 'WHEN DO YOU OWE SALES TAX?' (Accrual Basis selected) and 'WHEN DO YOU PAY SALES TAX?' (Monthly selected). On the right side of the window are buttons for 'OK', 'Cancel', 'Help', and 'Default', and a section labeled 'Also See:' with a link to 'General'.

3. Enter appropriate information in the **Preferences** window.
4. Click **OK**.
5. Click **Close** in the **Manage Sales Tax** window.

2-Sales Tax Items and Groups

Sales tax items identify the rate and the tax agency for which you collect sales taxes. There are two types of items for sales tax purposes:

- **Sales Tax Items** are used to calculate single taxes paid to a single tax agency.
- **Sales Tax Groups** are used to calculate two or more sales taxes grouped together and applied to the same sale.

Add Sales Tax Items and Groups

1. Click the **Manage Sales Tax** icon on the **Home** page.
2. Click the Sales Tax Preferences button.
3. Click the **Add sales tax item** button.
4. Select Sales Tax Item or Sales Tax Group as the Type.
5. Enter remaining information in the **New Item** window.
6. Click **OK**.
7. Click **OK** in the **Preferences** window.
8. Click **Close** in the **Manage Sales Tax** window.

View or edit existing sales tax items or groups by clicking **View Sales Tax Items** in the **Manage Sales Tax** window. Double-click to edit the appropriate item.

Buttons for 'OK', 'Cancel', 'Notes', and 'Spelling' are on the right. Below, 'Group Name/Number' is 'San Antonio' and 'Description' is 'San Antonio Combined Rate'. A note states: 'Enter each individual sales tax you need to charge in this district. QuickBooks will collect tax for these items as a group, but will report on each one individually.' A table lists individual taxes:

TAX ITEM	RATE	TAX AGENCY	DESCRIPTION
Texas State	6.25%	State Of Texas	Texas State
San Antonio City	1.25%	State Of Texas	San Antonio City Rate
San Antonio Speci...	0.75%	State Of Texas	San Antonio Specia...
Group Rate		8.25%	

An 'Item is inactive' checkbox is at the bottom right.

3-Sales Tax Codes

1. Click the **Manage Sales Tax** icon on the **Home** page.
2. Click Open Sales Tax Code List.

The 'Sales Tax Code List' window displays a table with columns: CODE, DESCRIPTION, and TAXABLE. The data is as follows:

4. Enter a code under **Sales Tax Code**.
5. Click the **Taxable** or **Non-Taxable** button as appropriate.
6. Click **OK**.
7. Click **Close** in the **Manage Sales Tax** window.

Track Accounts Payable

There are two ways to enter and pay bills. The method you use depends on if you track accounts payable for a transaction.

Tracking accounts payable means that you enter the bill before paying the vendor. If you track accounts payable, you always know how much you owe vendors for bills.

Steps if you use accounts payable: Enter Bill → Pay Bill → Print Check

If you do not use accounts payable, you directly write the check to the vendor. In other words, you do not enter the bill before paying the vendor. With this method, QuickBooks will not know how much you owe vendors for bills.

Steps if you DON'T use accounts payable: Write Check → Print Check

Enter Bill

Setting Up Payroll

Payroll Setup

Perform these three steps to set up payroll from scratch:

1. Select Payroll Service
2. Payroll Setup Interview
3. Create Payroll Schedules (optional)

1- Select Payroll Service

Basic Payroll

A *Basic Payroll* subscription is for companies who pay their employees directly, but have an accountant file tax forms. With this service you set up payroll, enter employee time, process paychecks, and make tax deposits. The service gives you up to date federal and state tax tables. This allows QuickBooks to calculate taxes automatically. Basic Payroll requires a subscription, a unique EIN, Internet access to download tax table updates, and a current version of QuickBooks*. Checks are sold separately. Terms, conditions, features, pricing and service options are subject to change.

Enhanced Payroll

Enhanced Payroll offers all the features of *Basic Payroll*, plus additional features that make running payroll faster and easier. You can print federal and state tax forms directly from QuickBooks. There is also a built-in method for tracking, reporting, and calculating workers compensation. A service called E-pay lets you electronically pay federal and selected state taxes. And, you can do net-to-gross calculations easily when preparing paychecks. Enhanced Payroll requires a subscription, a unique EIN, Internet access to download tax table updates, and a current version of QuickBooks*.

Assisted Payroll

With an *Assisted Payroll* subscription, all you need to do is enter hours for your employees and Intuit does the rest of the work for you.

After you enter employee hours into QuickBooks, the data is sent to Intuit via the Internet. Intuit creates paychecks and calculates and files payroll taxes for you. You can either print the paychecks or use the direct deposit service. Each quarter, Intuit sends you a copy of the filed federal and state payroll tax forms. At the end of the year, Intuit prints and mails you the W-2's. To use Assisted Payroll, you must have an internet connection, a unique employer id number, state withholding and unemployment tax id numbers, and a current version of QuickBooks*.

Direct Deposit

With the *Direct Deposit* option, you enter bank account information for each employee. Then, you enter paychecks in the normal fashion. Finally, you send the paycheck information to Intuit. The funds are directly deposited in each employee's bank account.

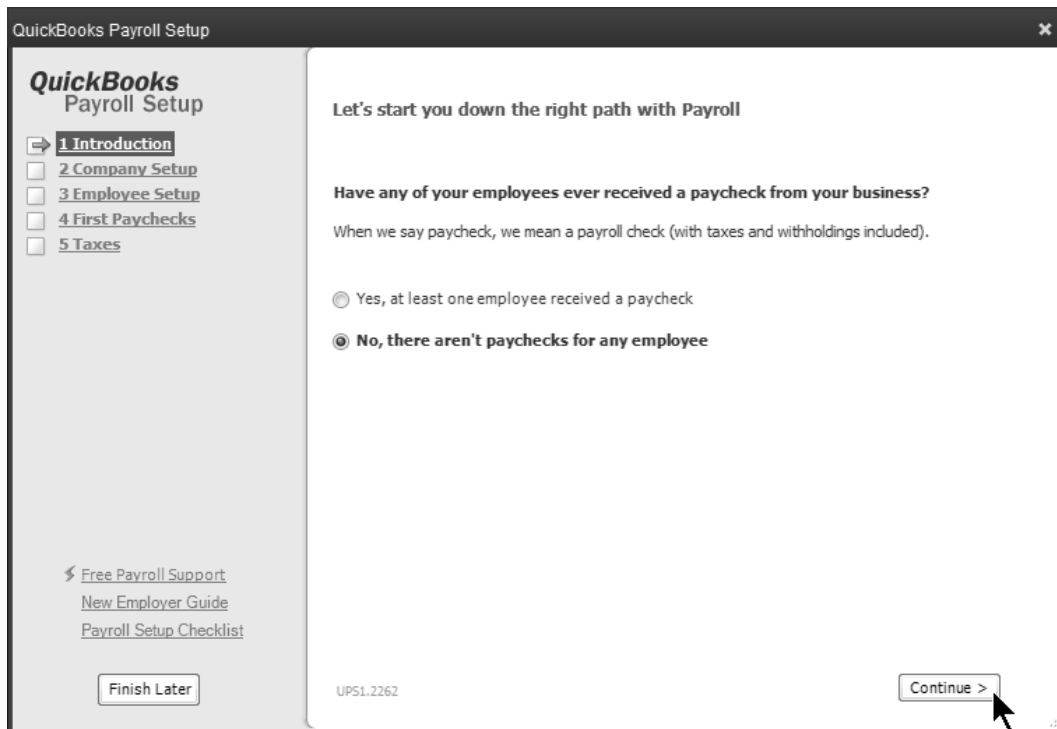

* Intuit's payroll services are compatible with the latest version(s) of QuickBooks. However, supported versions are subject to change.

2-Payroll Setup Interview

QuickBooks has a Payroll Setup Interview that walks you through the process of setting up your payroll. If you have not started using QuickBooks payroll, it is recommended that you use the Interview.

Start QuickBooks Payroll Setup

1. Select Employees:Payroll Setup from the menu.

The screenshot shows the 'QuickBooks Payroll Setup' window. On the left, a sidebar lists the setup steps: 1 Introduction (selected), 2 Company Setup, 3 Employee Setup, 4 First Paychecks, and 5 Taxes. Below the sidebar are links for 'Free Payroll Support', 'New Employer Guide', and 'Payroll Setup Checklist', along with a 'Finish Later' button. The main area of the window is titled 'Let's start you down the right path with Payroll' and asks 'Have any of your employees ever received a paycheck from your business?'. It explains that a paycheck means a payroll check with taxes and withholdings. Two radio button options are provided: 'Yes, at least one employee received a paycheck' and 'No, there aren't paychecks for any employee'. The 'No' option is selected. At the bottom right, a 'Continue >' button is highlighted with a mouse cursor. A small ID number 'UPS1.2262' is visible at the bottom left of the main area.

2. Select the appropriate option.
3. Click the **Continue** button.

Security & Multi-User

Multi-User QuickBooks

To use QuickBooks in multi-user mode, you must install a licensed copy of QuickBooks on each networked computer. The company file should be located on a shared resource (like a server or a hard disk that can be accessed by all users).

Administrator

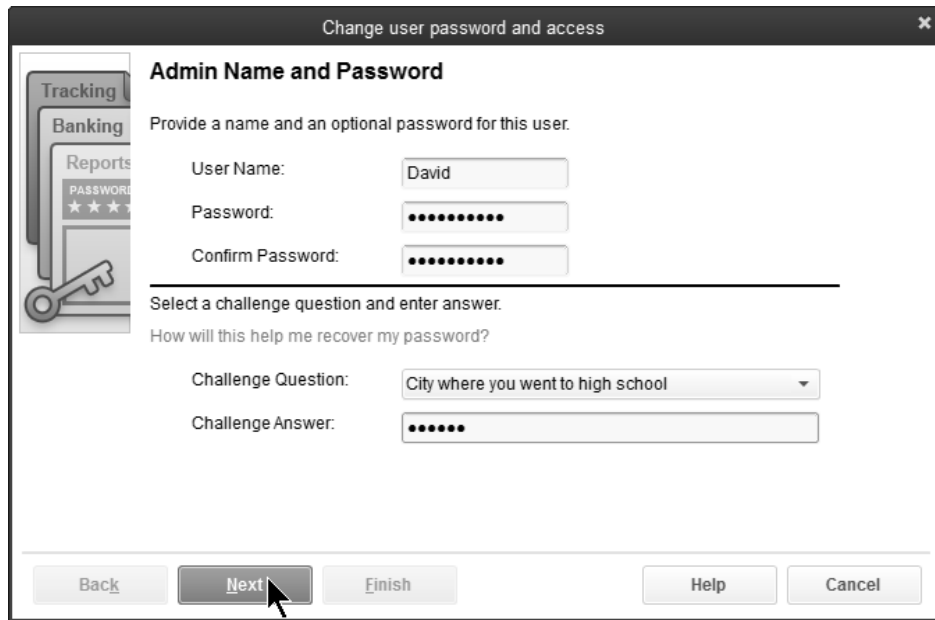

The first step is to designate one user as the *QuickBooks Administrator*. This one person has unlimited access to all of QuickBooks. The *Administrator* is the only person who can:

- Add new users
- Change a user's access privileges
- Import and export data*
- Change company info and preferences*
- Set and change the closing date and password*
- Create portable company files*

*An External Accountant user can also perform these tasks.

2. Click the **QuickBooks** tab and select **Update Report**.

The screenshot shows a dialog box titled "Update Report" with a close button (X) in the top right corner. Inside the dialog, there is a section labeled "Choose company file" with a text field containing the path "kBooks 2019\Sample_Company_File\Day 2 - Chapters 7 to 12 - 2023.qbw" and a "Browse" button to its right. Below this, a prompt says "Please select the date range for which you would like to update this report". There are two date pickers: "From" with the date "4/ 1/23" and "To" with the date "4/30/23". At the bottom, a note states: "Note: QuickBooks must close Excel to update the report. When the update is complete, QuickBooks restarts Excel for you. If your company file is big, this may take a few minutes." There are two buttons at the bottom right: "Update" and "Cancel".

3. Click **Browse** to select the location of your company file (if necessary).
4. Click the drop-down arrows to change the date range for the report (if necessary).
5. Click **Update**.

Export Report-Considerations

If you make changes to your exported report, Excel only keeps certain changes:

- Renamed report titles
- Font formatting in row and column headers
- Resized columns
- Renamed column and row headers
- Inserted rows and columns with information entered
- Formulas (the updated report must contain the row associated with the formula)
- Inserted text

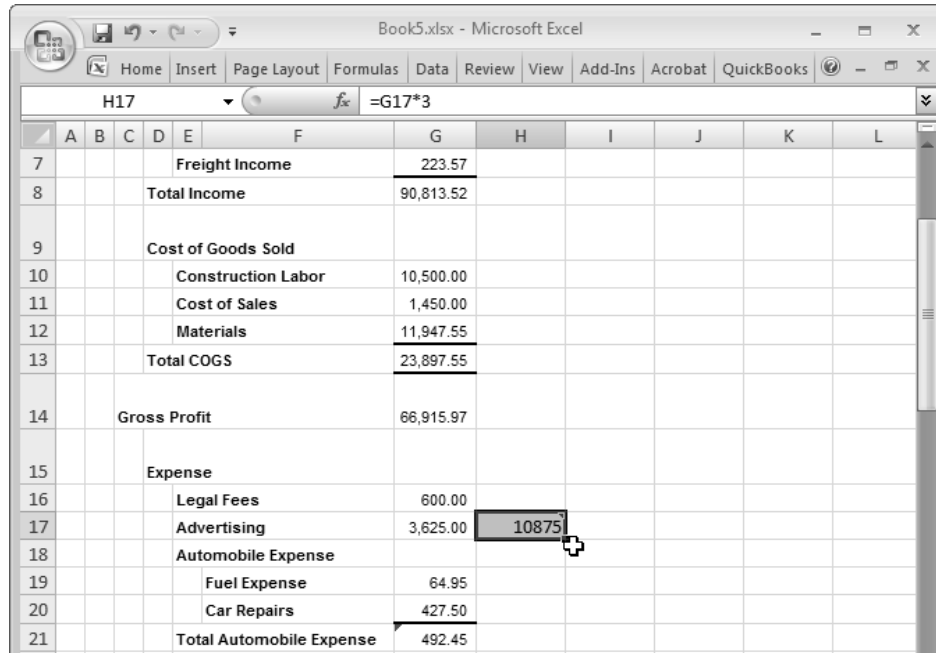

Any of the following changes you make to your exported report will have to be updated manually when the report is updated:

- Font formatting in non-header cells
- Formatting other than changes to Font
- Moved data cells

Formula Errors

If you entered a formula in your Excel report and you receive an error when you update the report, you have two choices:

1. Close the workbook without saving to retain the report before the update.
2. Save the report on **Sheet1** to keep the updated report without the formula.

The screenshot shows an Excel spreadsheet titled "Book5.xlsx - Microsoft Excel". The formula bar at the top displays "H17" and the formula "=G17*3". The spreadsheet contains a financial report with the following data:

	A	B	C	D	E	F	G	H	I	J	K	L
7						Freight Income	223.57					
8						Total Income	90,813.52

Chapter 18

Utilities

Backup Data Files

You should make regular backups of your QuickBooks company files and keep these backups off-site. This ensures you will always have a recent copy of your critical accounting records should a data loss occur.

QuickBooks makes this easy with options for setting the reminder frequency for backups, verifying data integrity, and scheduling backups at set intervals. You can also use Intuit's online backup service (additional fees apply).

There are four ways to back up your company file in QuickBooks:

1. Backup online
2. Manual backup
3. Automatic backup
4. Scheduled backup

Back Up Company Data File

1. Select File:Back Up Company:Create Local Backup from the menu.
2. Click the **Options** button.
3. Set the backup location and other options and click **OK**.

The 'Backup Options' dialog box is titled 'Backup Options' with a close button (X) in the top right corner. It contains instructions: 'Use this window to set default options for your manual and automatic backups.' The dialog is divided into two sections: 'LOCAL BACKUP ONLY' and 'ONLINE AND LOCAL BACKUP'. In the 'LOCAL BACKUP ONLY' section, there is a text field for 'Tell us where to save your backup copies (required)' with the value 'P:\Backup Folder\'. To the right of this field is a 'Browse...' button. Below this are two checked checkboxes: 'Add the date and time of the backup to the file name (recommended)' and 'Limit the number of backup copies in this folder to' followed by a spin box set to '5'. The 'ONLINE AND LOCAL BACKUP' section has a checked checkbox 'Remind me to back up when I close my company file every' followed by a spin box set to '4' and the word 'times'. Below this is a text prompt: 'Select an option to verify that your company data is OK (that is, not corrupted) when you save.' There are three radio button options: 'Complete verification (recommended)' (selected), 'Quicker verification', and 'No verification'. A 'Help me choose' link is at the bottom right of this section.

4. Click **Next**.
5. Select when to back up.
6. Click **Next**.
7. If creating a manual backup, click **Save**.
If creating an automatic or scheduled backup, set options and create a schedule.

The 'Create Backup' dialog box is titled 'Create Backup' with a close button (X) in the top right corner. It asks 'When do you want to backup your company file?'. On the left is a vertical sidebar with icons for a folder, a document, and a computer. The main area has two sections: 'BACK UP AUTOMATICALLY:' and 'BACK UP ON A SCHEDULE:'. In the 'BACK UP AUTOMATICALLY:' section, there is a checked checkbox 'Save backup copy automatically when I close my company file every' followed by a spin box set to '3' and the word 'times'. Below this is a text prompt: 'Click Options to view or change where the automatic backup copies will be saved.' and an 'Options' button. In the 'BACK UP ON A SCHEDULE:' section, there is a text prompt: 'Click New to schedule regular backups of your company file.' Below this is a table with four columns: 'DESCRIPTION', 'BACKUP LOCATION', 'STATUS', and 'NEXT BACKUP'. The table is currently empty. Below the table are three buttons: 'New...', 'Edit...', and 'Remove'. At the bottom of the dialog are five buttons: 'Back', 'Next', 'Finish' (highlighted), 'Help', and 'Cancel'.

8. Click **Finish**.

Restore Data Files

Restoring data files means recreating a company data file from a backup copy. You may do this for several reasons.

- The company file on your hard drive is damaged.
- The computer's hard drive is damaged.
- You wish to review your company data as it stood at an earlier date.

Restore a Company Data File

1. Select File:Open or Restore Company from the menu.

2. Select Restore a backup copy.
3. Click **Next**.
4. Select Local backup or Online backup.
5. Click **Next**.
6. Select the backup file being restored in the **Open** window.
7. Click **Open**.
8. Click **Next**.
9. Select an appropriate **Restore To** location.
10. Click **Save**.
11. Enter the **User Name:** and **Password:** in the **QuickBooks Login** window (if file is password protected).
12. Click OK in the QuickBooks Information window.

Updating QuickBooks

Versions

A new version of QuickBooks is released approximately every year. A new version adds new features and improvements. Intuit charges a fee for the purchase of a new version. Contact Intuit for current prices.

After the new version is installed, QuickBooks asks you whether your data file should be updated to the new version. By typing "YES", QuickBooks automatically updates your file to the new version. Once the file is updated, you can no longer open the data file in the previous version.

Maintenance Releases

Intuit occasionally creates maintenance releases for an existing version of QuickBooks. A maintenance release usually corrects problems in QuickBooks not discovered until after distribution of a new version. Also, Intuit might add features that were not available at the time the version was distributed. Intuit does not charge a fee for maintenance releases.

To determine the current version and release of QuickBooks, display the *Product Information* window.

Chapter 19

Year-End Procedures

Year-End Steps

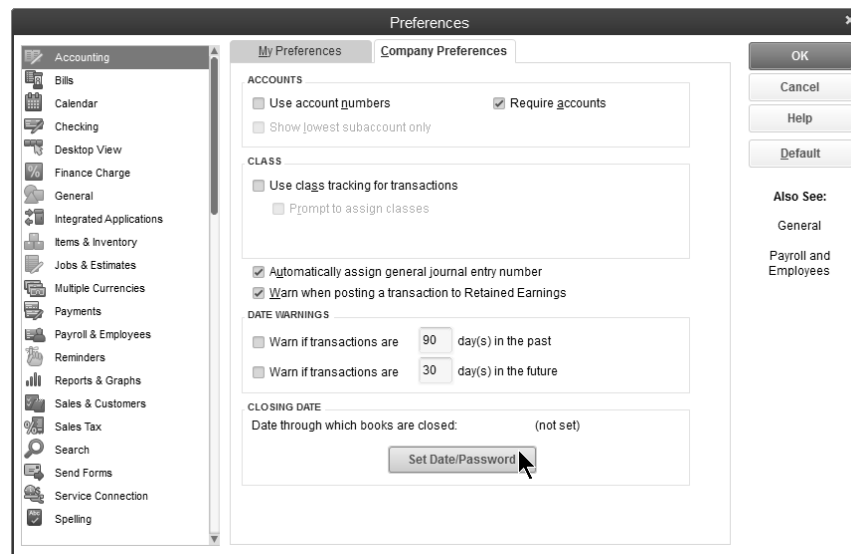

You can keep as many years of data in QuickBooks as you wish. However, there are certain procedures you should follow at year-end. In this chapter, you learn 3 steps to complete in QuickBooks at year-end. Consult your accounting professional regarding all year-end procedures your company must complete.

1. Set a closing date and password to restrict users from a prior period.
2. Provide your accountant with your QuickBooks financial information using a method such as the *Accountant's Copy*.
3. Incorporate changes from accountant.

Set a Closing Date

This year-end procedure involves restricting user access to prior accounting periods and setting a closing date and password. To make a change to a prior period, a user must have access and must know the closing date password.

5. Select Company>Set Closing Date from the menu.

6. Click Set Date/Password.

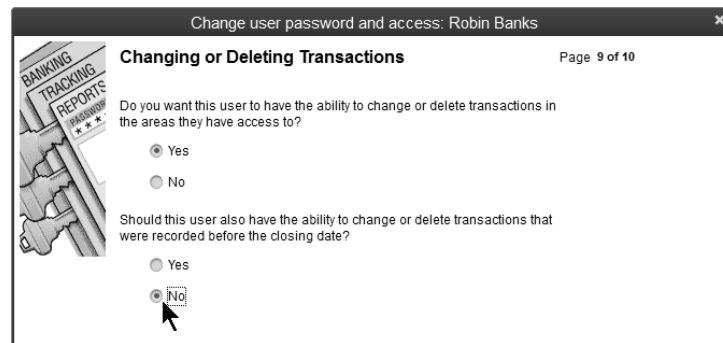

7. Enter a Closing Date.

8. Enter the password as the **Closing Date Password**.
9. Enter the password as the **Confirm Password**.
10. Click **OK**.

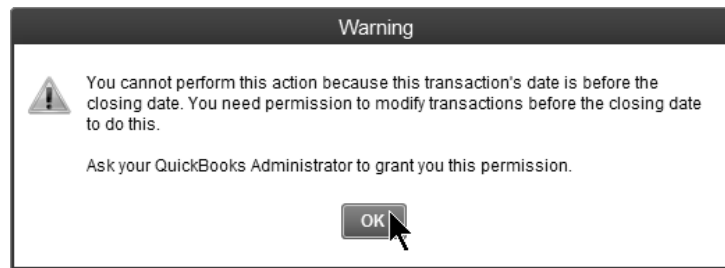

Restrict User Access to Prior Period

1. Select Company:Set Up Users and Passwords:Set Up Users from the menu.
2. Enter the **Password** in the **QuickBooks Login** window.
3. Click **OK**.
4. Select the appropriate user.
5. Click the **Edit User** button.
6. Click the **Next** button until you see the **Changing or Deleting Transactions** window.

7. Select if the user can change or delete transactions prior to the closing date.
8. Click **Finish**.
9. Click **Close**.

No Access to Prior Transactions

Financial Info to Accountant

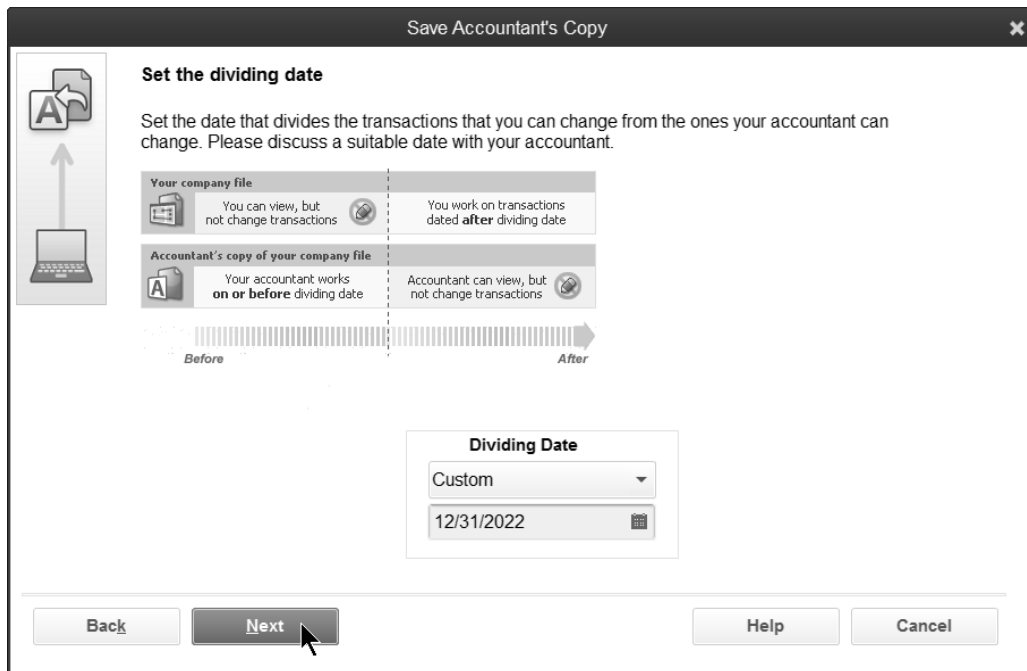

The *Accountant's Copy* is an efficient way to work with accountants that use QuickBooks. With this process, a special copy of your data file can be given to your accountant to enter adjustments. Meanwhile, you can continue to work on your original data file. When the adjustments are complete, the changes are imported into your original data file.

There are restrictions on you and your accountant while an Accountant's Copy exists. For a list of restrictions, search for "Accountant's Copy" in the QuickBooks Help system.

A *Dividing Date* is used to ensure changes you make in the current period don't conflict with changes your accountant is making in a prior period.

Create Accountant's Copy

1. Select File:Send Company File:Accountant's Copy:Save File.
2. Click **Next**.

3. Select a Dividing Date for the Accountant's Copy.
4. Click **Next**.
5. Click **OK**.

Incorporate Accountant's Changes

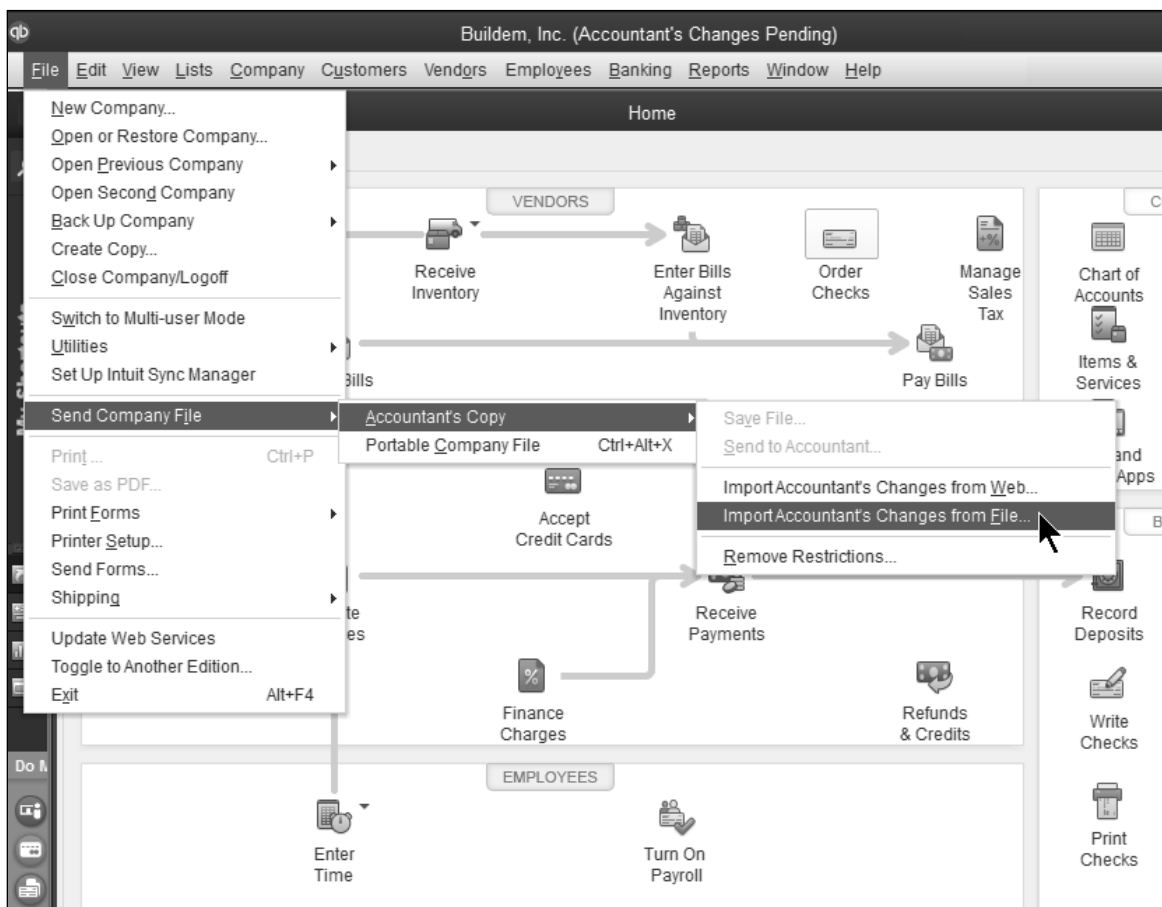

If you use the Accountant's Copy, you can import your accountant's changes into your QuickBooks data file.

If you are not using the Accountant's Copy, there are several ways your accountant's changes can be incorporated into QuickBooks. For example, your accountant might send you a list of year-end journal entries and ask you to enter them into QuickBooks. Or, your accountant might travel to your office to enter year-end journal entries.

Consult with your accountant to determine the most efficient way of entering their changes in QuickBooks.

Import Accountant's Changes

Select File:Send Company File:Accountant's Copy:Import Accountant's Changes from File.

For a business with inventory, the quantity on-hand is critical information. When you purchase inventory, you add to the on-hand quantity. Invoicing a customer reduces the quantity. If the actual quantity differs from the quantity in QuickBooks, you need to adjust the inventory.
