## ERPConnect

**Our new embedded banking solution enables commercial and business clients to bank with Citizens directly from their ERP or accounting software.**

ERPConnect brings your Citizens treasury services into Oracle NetSuite to help your account payables and reconciliation processes get more efficient.

Pay your bills and automate the writing of accounting entries. Get bank data feeds into your reconciliation module and save time to focus with your team on tasks with more added value for your company.

### Benefits:

- Save Up To 50% In Time. Eliminate the need to switch between applications by integrating Citizens directly into Oracle NetSuite.
- Pay How You Want To Pay. Pay your bills using a variety of payment rails from Citizens, including ACH, Wire and Checkprint.
- Easy And Secured Vendor Management. ERPConnect allows you to securely store and manage payment information from within NetSuite, and avoids any entry error when paying your bills.
- Reduce Encoding Errors. Our two-way connectivity between Citizens and NetSuite reduces error-prone manual entry, saving you time and money chasing encoding mistakes.
- Reconcile Faster With Bank Data Feeds. ERPConnect sources data directly from Citizens and shepherds this directly into NetSuite, making it easy to balance your books with data you can trust.
- Increased Visibility And Control. Follow all your payments at a glance and track real-time status without logging into Citizens portal. Gain visibility on your cash position and run your business with confidence!
