## Problem with multi-user hosting setup

Error code: H202

**This company file is on another computer, and QuickBooks needs some help connecting.**

**Here's how to fix this problem:**

On the computer where the company file is located, open the start menu, then open Quickbooks Database Server Manager. The Database Server Manager will scan your files and restore the connection.

For step-by-step instructions, click **Tell Me More**.

[Tell Me More](#)[Cancel](#)

QuickBooks

You can now use this file in multi-user mode.

OK

## QuickBooks Information

QuickBooks has opened in multi-user mode because at least one other person is using the company file in multi-user mode.

To use the file in single-user mode, ask the other user(s) to close the company file. Then, from your File menu choose "Switch to single-user mode."

OK

Passwords are case sensitive.
