

This audit trail was run when the name change on an account was discovered and the determination on first review was that somehow 'Bill' had actually changed more than the name of the account – totals, splits, etc.; until we tried (on a COPY of the file) to change it back. Both before (*not shown here, but saved as a file*) and after running Verify & Rebuild Data, the same overwrite has occurred.

Audit Trail

Entered/Last Modified April 4, 2020

Num	Entered/Last Modified	Last modified by	State	Date	Name	Memo	Account	Split	Amount
Transactions entered or modified by [Deleted User]									
Bill 5274590									
5274590	04/04/2020 13:31:55	bill	Latest	11/01/2001	flan				
5274590	04/04/2020 13:31:36	bill	Prior	11/01/2001	New				
5274590	11/15/2001 15:10:55	[Deleted User]	Prior	11/01/2001	The S				

After running Verify & Rebuild Data, the same issue happened in the Admin name and timestamp from 5/18/2020 overwriting that of 'Bill' who's date and timestamp on 4/4/2020 overwrote an earlier transaction change that was made long ago.
