**PROBLEM:** Getting this message when trying to export a report to Excel:
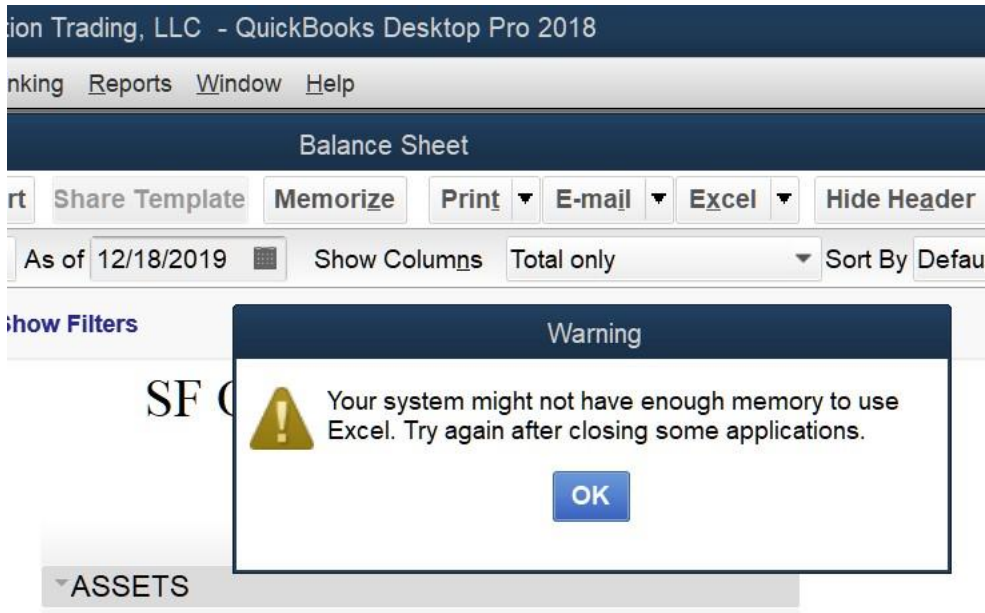

"Your system might not have enough memory to use Excel."

**EXAMPLE:**

1. Click on Excel
2. Click on "Create New Worksheet".

4. Quickbooks will, however, still allow a csv export:

hare Template | Memorize | Print ▼ | E-mail ▼ | Excel ▼ | Hide Header | Collapse

Send Report to Excel   ✖

WHAT WOULD YOU LIKE TO DO WITH THIS REPORT?

○ Create new worksheet

○ Update an existing worksheet   How it works

○ Replace an existing worksheet

⦿ Create a comma separated values (.csv) file
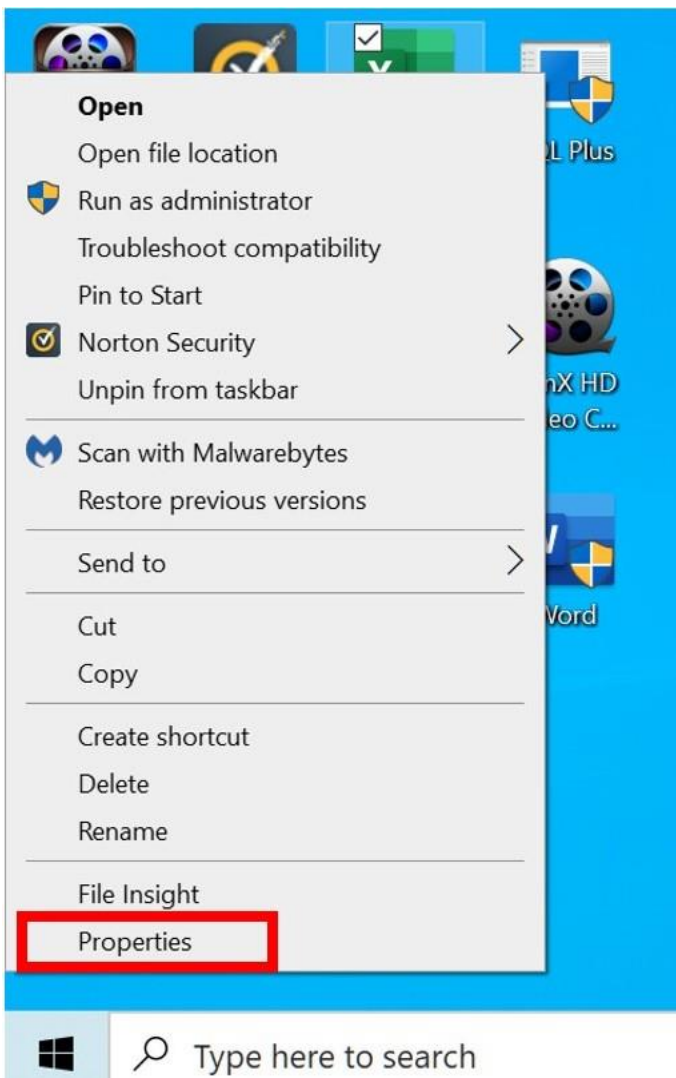

Advanced...

Export | Cancel | Help

SOLUTION: For me, simply running in Administrator mode eliminated the Memory warning message. The next steps show how to set Quickbooks so it always runs using Administrator mode.
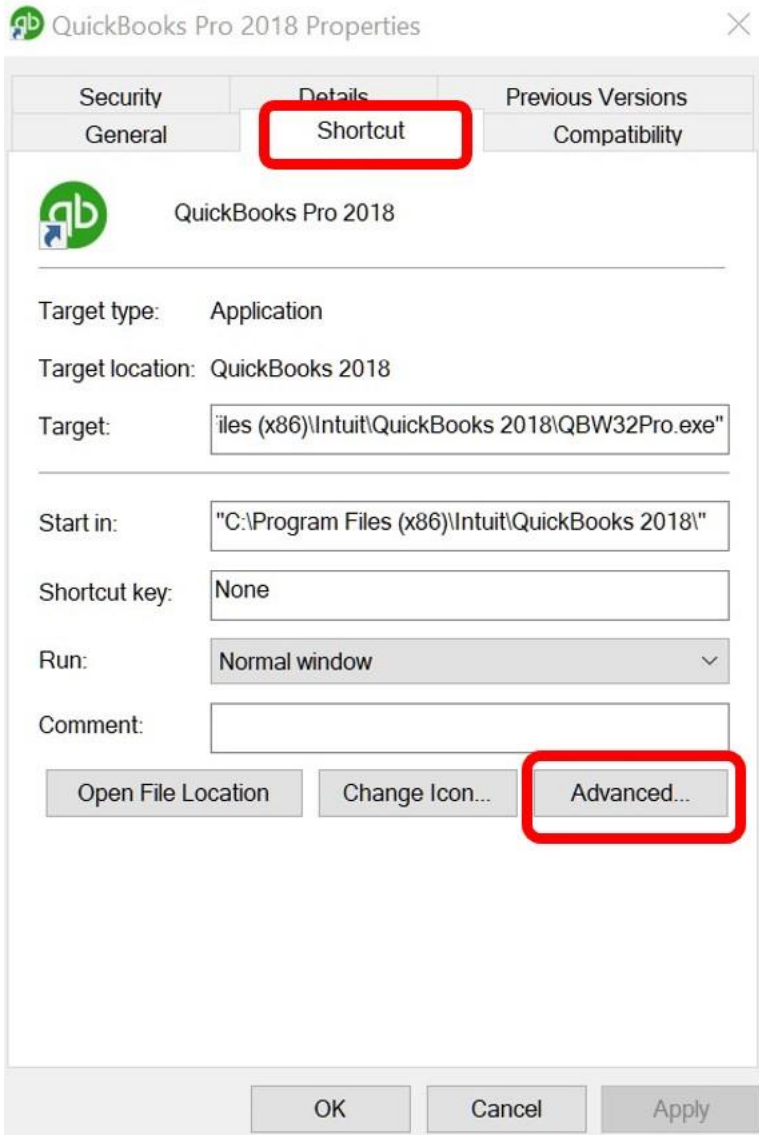

1. **RIGHT** click on the Quickbooks Desktop icon.

2. Click on "Properties". Properties is the last
   Item in the list:

3. Click on the "Shortcut" tab.
4. Click on the "Advanced" tab.

5. **Check the box that says: "Run as Administrator"**

6. **Click on "OK"**

7. Click on "Apply"

QuickBooks Pro 2018 Properties ✕

QuickBooks Pro 2018

Target type: Application

Target location: QuickBooks 2018

Target: `iles (x86)\Intuit\QuickBooks 2018\QBW32Pro.exe"`

Start in: `"C:\Program Files (x86)\Intuit\QuickBooks 2018\"`

Shortcut key: None

Run: Normal window ⌄

Comment:

[Open File Location]   [Change Icon...]   [Advanced...]
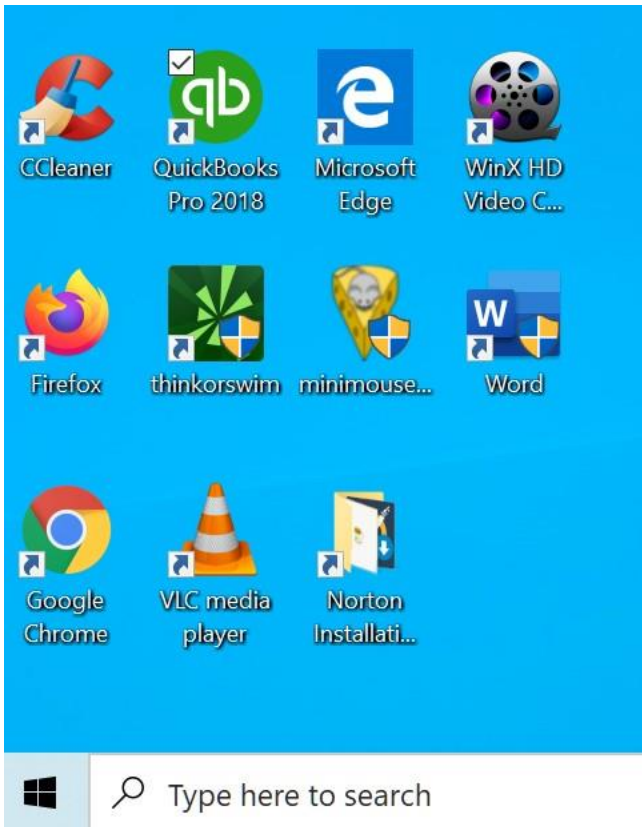

[OK]   [Cancel]   [**Apply**]

8. A message may pop up. Click on "Continue".

9. Click on "OK"

From now on, Whenever **LEFT** clicking on the Quickbooks Desktop icon, it will run in Administrator mode.

Hope this helps.
